DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1,2, 5-11 and 18, drawn to a composition for promoting wound healing using an effective amount of a compound having general formula as claimed in the instant claim 1.

Group II, claim(s) 3-4, drawn to a method of manufacturing a medicament comprising the compound having general formula as claimed in the instant claim 3.

Group III, claim(s) 12-17, drawn to a method of treating a stricture using the compound having general formula as claimed in the instant claim 12.

2. The invention listed as Group I- III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature which is referred to Annex B of Appendix A1 of the MPEP(Administrative Instructions under the PCT, "Unity of Invention"). Unity exists only when there is a technical relationship among the claimed inventions involving one or more of the same or corresponding special technical features. The express "special technical features" is defined as meaning those

Art Unit: 1614

technical features that define a contribution which each of the inventions, considered as a whole, makes over the prior art."(Rule 13.2). The question of unity of invention has been reconsidered retroactively by the examiner in view of the search performed; a review of US5,891,879 makes clear that the claimed species is not novel over the prior art (the instantly claimed compound). For instance, US'879 teaches a pharmaceutical compound comprising the compound encompassed by the claimed general formula that is used for treating or preventing restenosis. Furthermore, these references appear to demonstrate that the claimed species does not define a contribution which each of the inventions, considered as a whole, makes over the prior art. Accordingly, the prior art of the record supports restriction of the claimed subject matter in to the groups as mentioned immediately above.

3. A telephone call was made to Ms.Graeser(c/o The polkinghorns(Ms. Polkinghorns, Patricia)) on August 12, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

4. No claim is allowed.
5. All pending claims are subject to the restriction requirement.
